Safety Data Sheet Rosemary var. Verbenone oil

Description: The volatile oil obtained by steam distillation from the leaves & fresh flowering tops of the shrubby perennial Rosemary plants (*Salvia rosmarinus*).

Physical and Chemical properties	RANGE
Odour	Characteristic, fresh
Colour	Colourless to pale yellow
Specific gravity at 20°C	0,895 to 0,925
Refractive index at 20°C	1,450 to 1,474
Optical rotation at 20°C	+25 ° to +40 °
Flash point	43 °C

Main Ingredients:	CAS-No	Percentage
Alpha pinene	80-56-8	16 to 24%
Cineol 1,8 (Eucalyptol)	470-82-6	5 to 10%
Camphor	76-22-2	13 to 19%
Verbenone	80-57-9	8 to 14%
Bornyl acetate	76-49-3	8 to 15%
Borneol	507-70-0	Less than 5%

Technical specifications:

NCS, Natural Complex Substance (100% pure and natural)

EC-No: 283-291-9
 CAS-No EU: 8000-25-7
 CAS-No US: 84604-14-8
 FEMA-No: 2992
 N° FDA: 182.20
 N° CoE: 406n
 AFNOR: NF T 75-214
 INCI: SALVIA ROSMARINUS OFFICINALIS LEAF OIL

Handling and Storage

Precautions for safe handling

Avoid contact with skin and eyes. Avoid inhalation of vapour or mist.

Keep away from sources of ignition - No smoking. Take measures to prevent the build up of electrostatic charge. Ensure adequate ventilation. If the ventilation system is inadequate, wear an appropriate respiratory protection device. Handle in accordance with good industrial hygiene and safety practise.

Conditions for safe storage, including any incompatibilities. Store in cool place, keep container tightly closed in a dry and well-ventilated place. Store away from direct sunlight. Store in stainless steel container, opaque glass container or Fluorinated HDPE container. Air and light sensitive.

Shelf life four years from date of production.

First Aid measures

Description of First aid measures

General advice

Consult a physician. Show this safety data sheet to the doctor in attendance.

Eye contact: Wash eyes by normal first aid procedures for at least 15 minutes and consult a physician. If irritation persists or if skin lesions of any kind appear, consult an eye specialist, taking the product with you. If you wear contact lenses, rinse your eyes immediately. The lenses will probably fall out during rinsing. If not, remove them after rinsing. Do not put them back in. If you wear soft contact lenses, throw them away even if new. Hard contact lenses may be used again after proper cleaning by an eyecare professional. In all cases, do not wear contact lenses after the accident without the advice of an eye specialist.

Skin contact: Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. If irritation persists or if skin lesions of any kind appear, seek medical advice.

Ingestion: Clean mouth with water, call a POISON CENTRE or physician. If swallowed, do not induce vomiting. If vomiting occurs spontaneously, keep head low down to prevent aspiration into the lungs. If harmful effects persist or worsen, call a doctor. If patient is unconscious, place them in the lateral recovery position and call a doctor immediately. Make sure the area is well ventilated.

Inhalation: Inhalation may cause coughing, tightness of chest and irritation of the respiratory system. Remove person to ventilated area and follow normal first aid procedures. Perform artificial respiration if breathing has stopped.

Notes to physician: Treat symptomatically

Fire-fighting measures

Extinguishing media

Suitable extinguishing media: Use alcohol-resistant foam, dry chemical or carbon dioxide. Do not use a direct water jet.

Special hazards arising from the substances or mixtures

Forms carbon monoxide and/or dioxide upon burning. Possible production of toxic fumes under fire.

Unusual fire and Explosion Hazards

None, material is not pyrophoric, does not react with water, not an oxygen donor. Material is shock stable.

Advice for fire-fighters

Cool container exposed to the flame with water fog. Fire fighters should wear positive pressure self-contained breathing apparatus. Wear protective clothing to prevent contact with skin and eyes. Do not attempt to fight the fire with water, which tends to feed rather than smother the flames. Essential oils have the ability to float on water and this causes the fire to propagate more quickly. To put out an essential oil-based fire in its early stages, use a specific ABC dry powder fire extinguisher (or equivalent). Small fires can be smothered by covering with earth, sand or a blanket.

Accidental release measures

Personal precautions, protective equipment and emergency procedures

Use personal protective equipment. Avoid breathing vapours, mist or gas. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas.

Environmental precautions

Prevent further leakage or spillage if safe to do so. Do not let product enter drains, water courses or onto the ground.

Methods and materials for containment and cleaning up

Small spills can be wiped up with paper rags (placed in closed metal waste container). Large spill: contain spillage, and then collect with an electrically protected vacuum cleaner or by wet-brushing and place in container for disposal according to local regulations. Large spills can also be collected with non combustible absorbent material (e.g. sand, earth, diatomaceous earth, vermiculite) and placed in metal container for disposal according to local/National regulations.
